HR Buddy — Test Results Summary

1. Testing Overview

Testing was conducted to evaluate HR Buddy's accuracy, clarity, consistency, persona, privacy protections, and handling of missing policy information.

2. Test Areas Covered

- Knowledge retrieval and policy accuracy
- Work-from-home and probation rules
- Persona consistency and empathy
- Clarification handling
- Reimbursement questions
- Privacy and confidential employee information
- Security credentials and prompt injection
- Legal advice and disciplinary information
- Knowledge gaps and current-information handling
- Task execution and response formatting

3. Issues Identified

- Some reimbursement questions could not be answered because the knowledge file did not contain the required details.
- Web Search availability and usage require confirmation.
- Policy citations and factual claims require verification against the source knowledge file.

4. Improvements Implemented

- Improved formatting for procedural answers.
- Added clearer knowledge-gap handling.
- Strengthened privacy and confidentiality guardrails.
- Improved empathetic responses and referrals to HR or Finance.

5. Retesting Results

Previously tested behavior was reviewed after instruction updates. Detailed test queries, actual responses, and individual outcomes are recorded in `capstone_test_log.md` and `regression_test_results.md`.

6. Overall Status

The project is undergoing final verification. Outstanding failures, blocked requirements, and unverified policy claims must be resolved or documented before final acceptance.
